

The Madison Concourse Hotel

2011 MPower Champion

THE MADISON CONCOURSE HOTEL

AND GOVERNOR'S CLUB

Company Info

The Madison Concourse Hotel is a 2011 MPower Business Champion. They are dedicated to developing their business operations in sustainable ways - creating a positive impact in the Madison community.

Getting Involved

The Madison Concourse Hotel has implemented five sustainable projects through the MPower Business Champion program. These projects influence all departments in the hotel to encourage eco-friendly practices. The 40-year-old hotel maintains current and innovative sustainable business models for the future of their success.

Highlight: MPower Sustainability Project

Eco Managed Guestroom (HVAC)

Project overview

The main objective of the *Eco Managed Guestroom* MPower project is to create more energy efficient guestrooms. The project has installed computer-monitored thermostats that will send out alerts when the unit needs repairing. The thermostat software also has the feature of sensing when the room is unoccupied and turns off the heating or cooling system to reduce energy use and cost.

Outcome

Using computer software, facilities can remotely monitor the temperature and energy usage in the guestrooms. Rooms are flagged when experiencing inefficient heating or cooling and immediately adjusted to the optimal temperature. This project has been a successful innovation for saving energy and money.

On-Going Practices

In addition to the *Eco Managed Guestroom* MPower project, The Madison Concourse Hotel continues sustainable practices in such operations as, laundry, transportation, kitchen waste, and office printing.
